Mario Mendonça

Engenheiro de Software @ Livelo | React | React Native | Node.js | Typescritp | Java | Spring Boot
Recife, Pernambuco, Brasil

Resumo

Full Stack Software Engineer with five years of experience in building robust and scalable web and mobile applications. Proficient in multiple languages and frameworks, including Java, JavaScript, Spring Boot, Node.js, React, React Native, and TypeScript. Experienced in microservices architectures, RabbitMQ, SQL and NoSQL databases, and cloud computing. Strong problem-solving skills and ability to mentor developers. Extensive experience working with startups, building applications from the ground up, and contributing to both technical and strategic aspects of early-stage companies.

Experiência

Livelo Brasil
Líder técnico
outubro de 2022 - Present (3 anos 9 meses)
Recife, Pernambuco, Brasil

Fala Agro
Full Stack Developer
junho de 2021 - julho de 2023 (2 anos 2 meses)
Recife, Pernambuco, Brasil

FalaAgro is a startup geared towards people in the rural sector and in mid 2021 they were looking for a dev and I was looking for ways to learn more about development and business in general so it was a perfect match. Since I joined FalaAgro, in addition to participating in some events and talking to people who really feel the pain of the problems we intend to solve, we went through an incubation process (Garoa Habitat) and an acceleration of InovAtiva, where we got the seal of accelerated startup and now, finally, we were chosen for the Startups NE program at SEBRAE, where we will have another opportunity to develop both as a company and as a person, learning more and more how to run a company. Currently the application is in the testing phase and will soon be released to the public. Being at FalaAgro has

been a challenging journey but with many learnings, in addition to having developed myself as a developer, I also grew a lot in terms of business, I participated in several mentorships where I was able to learn a lot about how a company works, what should be done and the what you shouldn't, how to go to the market in search of customers and/or users, how the user's experience should be, about some bureaucracies that exist in addition to all the networking I've been doing.

Gowdock
Full-stack Developer
fevereiro de 2021 - agosto de 2022 (1 ano 7 meses)
Recife, Pernambuco, Brasil

I was looking for news challenges and learnings when I joined Gowdock as Front-end intern and in the beginning I was able to learn a lot about React and React Native, programing logic and bigger projects overall, how to reuse codes, how to build a cleaner code, in addition to understanding well how git works (before it I only used simpler commands). Gowdock is a startup with few collaborators, so I Always had a lot of freedom to challenge myself and learn new things, after some months I started to learn and help in backend that uses nodes with SOLID principles and clean architecture, in the beginning it was a little complicated understand each layer and the reason for its existence, but after some time practicing and and studying the things became simpler. This time at Gowdock was very good for me, I learnt more about React, React Native and Nodejs, in addition to having learnt new tools that I had never been in contact before like GraphQL and Typescript.

Seed a Bit Tecnologia
Frontend Web Developer
janeiro de 2020 - abril de 2021 (1 ano 4 meses)
Recife, Pernambuco, Brasil

Seed a Bit is a junior company from Rural Federal University of Pernambuco (UFRPE) that sells technological solutions. I joined Seed a bit at the end of my first period of college, before that I had only studied and done projects with python, there I got into web projects and was able to develop my skills in HTML, CSS, Javascript and React. In addition, I improved my communication and leadership skills by participating in weekly and monthly meetings as well as participating in events of the junior companies movement (MEJ). As a company with a culture of participation and whose motto is “everyone is the owner”, I was able to participate in the company's strategic decisions, developing myself in business area.

Formação acadêmica

FIAP

Postgraduate Degree, Software Architecture · (março de 2025 - março de 2026)

UNINASSAU

Bachelor's degree, Computer Software Engineering · (janeiro de 2023 - dezembro de 2024)
